

Excellence in IIoT Application

Recognising an outstanding implementation of IIoT that enhances mining and minerals processing operations. The application must be new to market, or significantly change/improve an existing model, within two (2) years of the nominations' closing date.

Please list the IIoT application name (as it should appear in marketing and communications)
Please provide a brief nomination summary, which will be used in any marketing (100-150 words).
When was the application introduced?

1. Explain what the application is and how it provides real-time feedback and the impacts of this on the operation it's used in. (30 points)
2. Demonstrate how the application improves on-site processes in at least one of the following areas: maintenance, productivity, efficiency. (30 points)
3. Include a case study or a practical example demonstrating success at an Australian mining or minerals processing operation. (40 points)
