

Sustainability Project of the Year

Recognising a project that has been implemented to improve sustainability and focuses on decarbonisation and/or reducing waste and/or waste emissions. The project must have been implemented within two (2) years of the nominations' closing date.

Please list the project name (as it should appear in marketing and communications).

When was the project implemented?

Please provide a brief nomination summary, which will be used in any marketing (100-150 words).

1. Explain the project and any new technology used to bring it to fruition, including how it may differ from existing industry standards and/or how it can be adopted more widely. (40 points)
2. Provide examples of any measurable success, for example, significant progression towards or achieving industry targets for net emissions, programs to improve decarbonisation or emissions reductions. (60 points)
